

Taking care of the society in which, the Evaco Group operates is the most rational way of doing business. For this reason, Evaco Ltd has founded the Evaco Foundation in September 2020, thanks to which the latter can improve the living standards of the needy segments of the population, fight discrimination, and also provide equal access to the benefits of the residents. In this regard, the success of the Evaco Foundation has become an example for many companies that are just thinking about implementing the foundations of a socially responsible business.

If we talk about the initiatives implemented by the Evaco Foundation, they can be divided into several areas:

- Sports initiatives. The company successfully develops youth sports on the island. The activities are inextricably linked with the support of young talents. The foundation contributes to the development of sports infrastructure in the country, especially in the north of the island. Significant support is provided in the field of equal access to sports for children with special needs.
- Educational initiatives. The charitable organization supports innovative educational programs aimed at educating children. Thanks to its work, the foundation increases the availability of education to disadvantaged children.
- Initiatives in the field of children's health and well-being. Thanks to the work of Evaco Foundation, it is possible to ensure the development of healthcare, as well as to form the appropriate infrastructure. The Company also ensures the provision of targeted assistance for children who belong to socially unprotected segments of the population.
- Environmental initiatives. As part of the work of the Foundation, the implementation of projects aimed at the development of the surrounding villages of the North of the island and the improvement of environmental protection measures is ensured.

The objects of the Evaco Foundation are to:
